- (1) direct line for electro-acoustic guitar

Bass

- (1) direct line from amp direct out OR appropriate microphone

Keys

- (1) direct line from keyboard direct out

Drums

- kick
- snare
- (3) toms
- hi-hat
- (2) overheads

Logistics

The following are minimum requirements for a safe, problem-free performance. If The Musician feels that these requirements have not been sufficiently met, The Musician reserves the right to postpone the start or continuation of The Performance until the issues have been resolved to acceptable standards.

- **Access:** The Musician requires access to the performance area at least two hours prior to start time and at least one hour after finish time.
- **Area:** Minimum stage requirements are a 12-foot wide by 8-foot deep area for setup, plus space for speakers and lighting stands.
- **Power:** Minimum power requirements for the PA are two UNSHARED 15-amp, 120-volt outlets from a reliable power source within 30 feet of the set-up area. An additional UNSHARED 15-amp, 120-volt outlet on a separate circuit (different breakers) is required for stage lighting if it is being used.
- **Exposure:** The facility should completely cover and protect the band's equipment from adverse weather conditions, including direct sunlight, rain, excessive winds, etc. Outdoor shows require at least a 10-foot by 20-foot EZ-Up tent with sides that roll down.

In the event of inclement weather during an outdoor show, The Musician will not under any circumstances perform in any exposure to the rain or during any kind of electrical storm. In this event, continuation of The Performance will be postponed until conditions have cleared to the satisfaction of The Musician

- **Flooring:** Sound equipment cannot be safely set up on uncovered ground. Minimum flooring requirements for an outdoor show are plywood sheets with some kind of covering securing them in place (carpet, rug, etc.) set up on level ground and approved in advance by The Musician.
